

## Green extraction process from a plant matrix

### Technologie

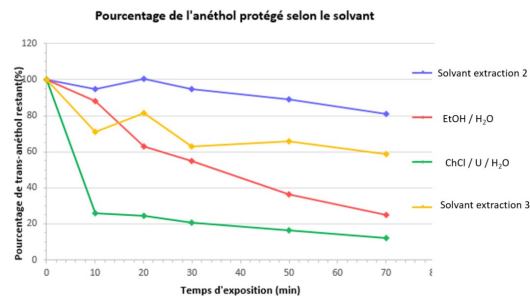

**One-step** extraction of substances of cosmetic interest from a plant matrix.

The solvent has a **protective** and **stabilizing effect** on the extracted molecules.

*The antioxidant effect of the extract is stabilized for at least 6 months*

*The solvent protects the extracted anethol molecule (blue)*

### Avantages

- Use of a **bio-based compound** for the extraction
- Process in **mild conditions**
- The solvent is **suitable for cosmetic use** and can be kept in the **final formulation**

### Applications

- Cosmetics
- Fragrance industry

#### Mots clés

- One-pot
- Green process
- Biobased
- Suitable for cosmetics
